Cable Tray

# ABOUT US

At Shreenathji Enterprises our people are our key point of difference, and we have always sought to attract the highest caliber of industry professionals. We boast a pool of talented and experienced professionals offering an unparalleled breadth of products in Fall Arrest Systems/Horizontal Lifeline System/Vertical Lifeline System, FRP Walkway and all other types of walkways, Cable Trays for Solar Industry. Our team is known for their innovation, leadership and exceptional client service. It was established in 2019 with a vision to provide the quality products and long lasting for the innovative engineering.

## OUR PRODUCT

FRP Grating  
GI Cable Tray  
Skylight Protector

Fall Arrest System  
Solar Structure

GI Walkway  
Solar Aluminum Rail

*“ SAFETY IS GAINFUL, ACCIDENT IS PAINFUL ”*

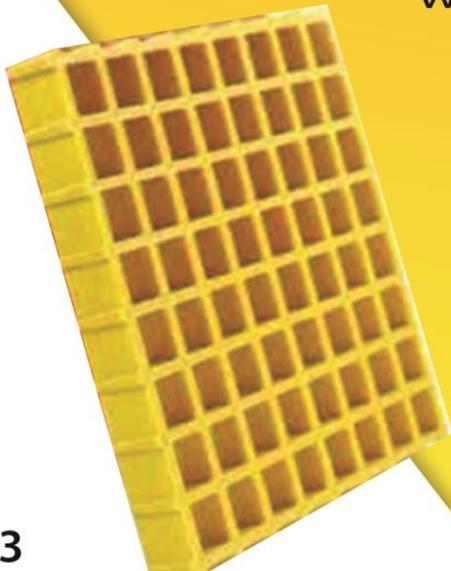

# FRP PULTRUDED & MOLDED GRATING

FRP moulded fibreglass is a one piece reinforced polyester or vinyl ester grating available in standard panel & sizes . It is manufactured by interweaving continuous truly vetted fibreglass trend with thermosetting system.

Saving on labour & equipment often make the total installed cost if FRP product comparable to that of steel. Combining these installationn saving with low maintenance, long life & work safety.

Colour Type :

Corrosion  
Resistance

High Strength  
to Weight Ratio

Slip  
Resistant

Electrically & Tharmally  
Non Conductive

Low  
Maintenance

Impact  
Resistant

Fire  
Retardant

Low Install  
Costing

# Hand Moulded FRP Grating

S. No.	Description	Width	Length	Height / Thickness	Mesh Size	Load Bearing Capacity
1.	FRP Grating	300 mm	1830 mm	10 mm	25mm X 50mm	250kg/sqmtr
2.	FRP Grating	315 mm	1000 mm /2000mm	15 mm	38mm X 38mm	450 to 500 kg/sqmtr

# Machine Moulded FRP Grating

S. No.	Description	Width	Length	Height / Thickness	Mesh Size	Load Bearing Capacity
1.	FRP Grating	310 mm	1000 mm /2000mm	25 mm	38mm X 38mm	250 kg/sqmtr
2.	FRP Grating	310 mm	1000 mm /2000mm	15 mm	38mm X 38mm	150 kg/sqmtr

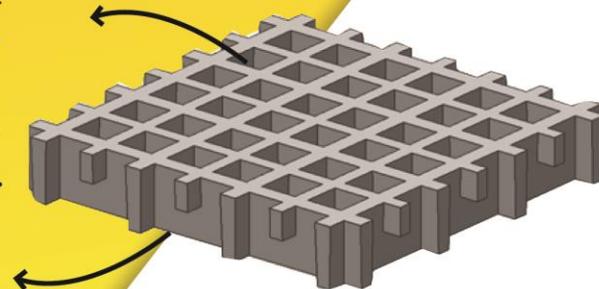

**\* Note : GAP BETWEEN LOAD BEARING CAN VARY AS PER CUSTOMER REQUIRE \***

### MENISCUS SURFACE

The top grating is concave in shape & provides superior slip resistance. Widely used in oily or wet conditions. This is the standard surface option for all type of mmolded grating.

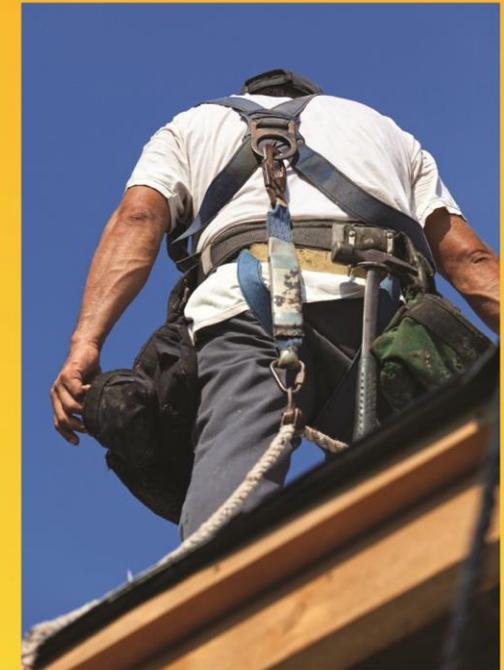

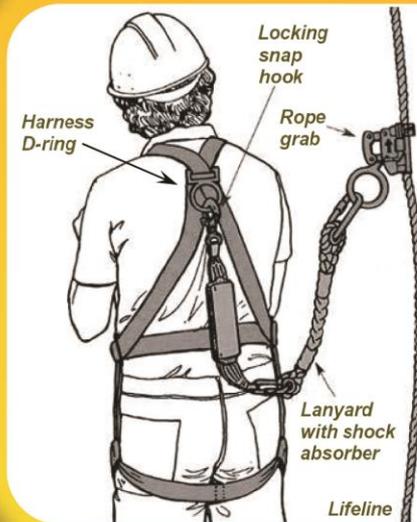

### GRITTED SURFACE

The top surface of grating is gritted & provide excellent slip resistant.

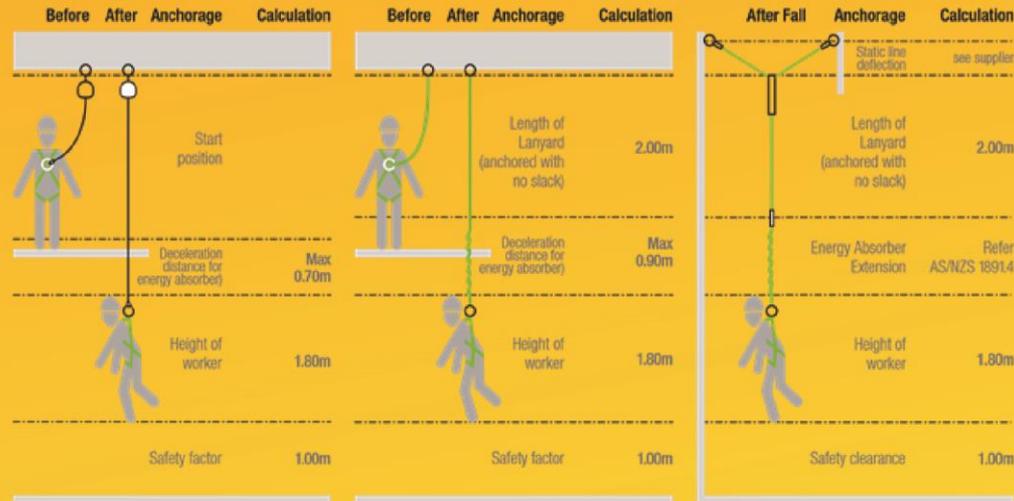

# FALL ARREST SYSTEM

Lifeline System reflects our passion towards engineering and innovation. The fun with lifelines is to provide anchorage and mobility in the most difficult and complex industrial installation.

## Horizontal Lifeline System (or Hill System)

Lifeline system can be arrest workers in the events of a fall (active system), or restrain workers from reaching a fall hazards (restraint).

## Vertical Lifeline System (or Fall Protection)

The system can be various types of ladder, telecom tower ladder, transmission ladders. System arrest the climber in climbing the structure & provide a short fall arrest distance reducing the impact load on the climber.

*“ Safety should have no holiday ”*

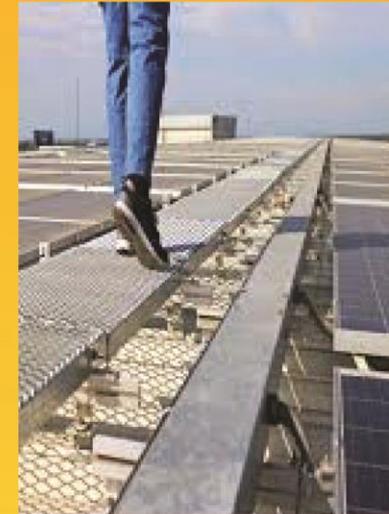

# G I Walkway

Walkways are used to allow easy and regulated access for movement on Solar Rooftop both for normal movement and for repair or maintenance. Made out of corrosion resistant material, can be delivered in standard sizes and can also be customised to customer requirements.

## Key Point :

- ▶ Easy to transport
- ▶ Easy to installation
- ▶ Best way to way in between solar panels

*“ Don't Learn safety by Accident “*

## Perforated Type Cable Tray

Used for relatively smaller size cables & control cables. These can accommodate large number of branch lines & have high load bearing capacity. These type of trays are also available with covers.

They can be made in all sizes from 50mm to 600mm width depending on requirements.

It is made in GI , Aluminum, Steel, Stainless Steel

We can also customize the products for any specific customer requirements,

# Solar Structure

When it comes to innovation, ease of installation and economy, our rooftop solar mounting systems stand out. They are simple do-it-yourself kits which dramatically reduce installation time and costs.

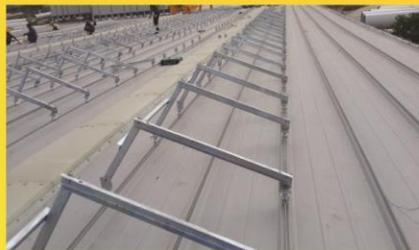

## Fix Structure

This is a non-penetrative ballast structure, for which the installation costs are minimal as it is a modular structure with only 5 components designed for quicker installation.

## Clamp Structure

A light-weight clamping mechanism, with a built-in compatibility that allows it to mount any module type. The water-tight EPDM sealing in it provides for 15-minute water logging. The innovative connecting in it provides for faster and easier installation.

## Klip Structure

Our arrangement is specially designed, patent pending arrangement which ensures stability of the rooftop solar mounting system without taking any support from the underlying truss system of the building.

*“ Avoid the worst Put safety first ”*

# SOLAR ALUMINUM RAIL

Aluminium Rails is light weight and cheap, can be used on various hooks and fixtures. Solar PV Mounting Rails is in good quality with cost-effective solar rails price. High strength, Anti-UV, high frequency insulation , Chemical Resistance & Weatherability Anti-Corrosive . Customized length: 250mm to 1200mm and can be customized.

*“ Safety is not a gadget but a state of mind ”*

# Skylight Protector

Shreenathji Enterprises has been designed specifically to prevent falls through rooflights. The uniquely designed innovative product provides protection for personnel accessing near fragile roof lights while carrying out maintenance or inspections on industrial roofs.

## Flat Skyliht Protector

Flat skylight protectors that fit skylights of a sleek nature. This range includes simple mesh flat skylight protectors to extra-secure framed skylight protectors.

## Raised Skyliht Protector

Roof Safety also offer raised skylight protectors for buildings that are higher in dimension. Skylight protection can be overlooked when securing your premises. Be proactive about the safety of your employees and contractors by securing your skylights and prevent serious injuries or even fatalities.

*“ Your body is a big part of your capital ,  
don't invest it in the bank of careless habits ”*

# Roofer Personal Safety Kit

Full Body Harness

Karabiner

fall Arrest Lanyard

AUTO FIRE  
EXTINGUISHER BALL

Retractable Lifeline System

**Always Remember  
Your Goal is not just to Work Safely  
But to Reach Home after the Work Safely**
